

In a three-part **Learning Systems** series, Bellwether looks holistically at the impact of artificial intelligence (AI) in education and offers a set of recommendations for stakeholders to build strong capacity, resilient infrastructure, and thoughtful design.

Strong Capacity

1. Strengthening AI literacy.
2. Enabling development of policies and guidelines.
3. Bridging educators, developers, and researchers.
4. Expanding sectorwide capabilities.
5. Diversifying voices at the table.

Resilient Infrastructure

6. Robust data infrastructure.
7. More quality datasets and new benchmarks.
8. Continued research and learning.

Thoughtful Design

9. Purposeful, inclusive, and research-backed AI design.
10. Intentional human-AI relationship.
